OFFICE OF PETITIONS11/27/2002 AKELLEY 00000003 500369 10013084 PETITION UNDER RULE 37 CFR 1.47

01 FC:1460 130.00 CH

Dear Sir:

The below signed attorney for the applicant hereby sets forth the following facts to support the filing of the above-identified application without the signature on the declaration of one of the inventors. This petition is being submitted together with a response to Notice of Missing Parts dated 01/10/2002, filed herewith.

To the best of my information and belief of the pertinent facts, one of the co-inventors, Dan. A Steinberg, refuses to sign the declaration. Three other co-inventors have signed the declaration.

On information and belief, the following are the pertinent facts (listed as 1 through 7):

1. The company where all the inventors were/are employed (Haleos Inc.) is in Chapter 11 bankruptcy proceeding. Mr. Sherrer told me on the phone about two weeks ago that he attempted to reach Mr. Steinberg personally, Mr. Steinberg was asked to sign the application, and that Mr. Steinberg refused to sign the application. MT Sherrer told me that Mr. Steinberg also gave the same answer regarding other pending applications where he is listed as an inventor.

2. I spoke with Mr. Sherrer on the phone today, he told me that due to the company's current financial situation the company was shut down during the last two weeks (weeks of August 5th and July 29th of 2002), which made it close to impossible to pursue this matter further during the last two weeks.

3. Mr. Steinberg is a registered patent agent (Reg. No. 45129, 410 Lee Street, Blacksburg VA USA 24060, the address listed in the PTO's roster of attorneys and agents), who is certainly aware of the application, its contents and the importance of the inventor's signature.

4. Today is the last day of the last available extension to file the response to Notice of Missing Parts in the above-referenced application.

5. During years 2000, 2001, and 2002 the company filed more than 100 patent applications. Due to the Chapter 11 bankruptcy proceedings, Mr. Sherrer's company could not keep a number of applications pending, so they went abandoned. The company tries to maintain as many applications covering its valuable technology pending as possible and, hopefully, have them examined and later issued as patents.

6. My firm was asked to assist Haleos Inc. in the task of keeping the pending applications alive, receiving the final authorization to proceed about 3 weeks ago. We are trying to save numerous applications with impending bar dates/expiring statutory periods, and while the best possible efforts to preserve the patent portfolio have been made, the company's shut down has made it close to impossible to obtain documents pertinent to the pending cases.

7. As stated by Mr. Sherrer, all inventors are under the obligation to assign the invention to Haleos.

The applicants will be irreparably damaged by the loss of benefit of the application due to Mr. Steinberg's refusal to sign the declaration. Due to the expiration of the statutory period of pendency of the above-referenced application today, August 12, 2002, (the last day to respond to the Notice of Missing Parts) and the current Chapter 11 proceedings, yet another application protecting the technology which is the claimed subject matter of the above-identified application may go abandoned.

If any additional information is required in connection with this petition, please contact the undersigned. Please charge the fee due with this petition to our deposit account 500369.

Respectfully submitted by:

Maria Eliseeva
